

## ABRASIVE CUP BRUSH

This abrasive filament cup brush is ideally suited for prepping a truck bed for increased adhesion of INTER-LINER Hybrid UV. Prep up to 50 trucks with one cup brush and do a better job with less effort and in half of the time required for hand scuffing. The nylon filaments of the cup brush are impregnated with silicon carbide and perform best at low speed (1000-2000 RPM) leaving an effective swirl pattern and less dust. Mounts to any standard electric or pneumatic polisher with a 5/8-11 UNC spindle.

*Special design helps prevent clogging and loading*

*Constructed of non-oxidizing materials which will not react with metal*

*Non-sparking material creates a safer brush than conventional wire brushes*

*Lasts up to 6 times longer than conventional wire brushes under normal circumstances*

*Unit has standard 5/8" thread and a maximum of 6500rpm*

**7046** 6" Cup Brush
